

K9 ROOF RACK SYSTEM

PLATFORM GUIDE

The K9 Roof Rack Platform from Eezi-Awn is a revolutionary advancement in expedition-style racks; it is thinner, lighter, stronger, quieter, more functional, more aerodynamic, more durable, and more aesthetically complimentary to your vehicle than the competition. Made from matte black powder-coated, extruded aluminum with fully-welded joints (not bolts), the low-weight K9 offers an infinite number of gear organization configurations. At only 1-3/8" thick, the platform itself is very low-profile with aerodynamic edging that won't slow you down. With a modular system outside your vehicle to accommodate shovels, axes, jerry cans, and more, you save valuable space inside your vehicle.
